

Insert an external page

The service allows to insert into a page an external HTML page inside an i-frame.
The HTML content of the page is inserted without **styles over**.

The service provides the following parameters:

- * **title**: add a title to your iframe
- * **url**: link to external HTML page
- * **height**: height of iframe
- * **border**: to add a border to the iframe
- * **transparency**: feel free to use transparency (the background color will be ignored)
